

Measurement tables

Workwear with a perfect fit is not only more comfortable, but also safer and more practical. Take your measurements as shown in the drawing. Measure directly against your skin. Keep the measuring tape close to your body but not too tight.

Chest measurement:

Measure your chest at the fullest point **(A)**.

Waist and hip measurement:

Men: measure your **waist** circumference where you normally wear your trousers **(B)**.

Women: the **waist** circumference is measured horizontally at the narrowest part of the waist (natural waist line) **(B)**.

Measure your **hip** circumference at the fullest point **(E)**.

Inside leg length:

Measure your inside leg length from the crotch to the desired length. Stand up straight **(C)**.

Most Dassy work trousers are available in 3 different inside leg lengths: **Standard** (normal), **Minus** (short) and **Plus** (long). Thanks to the special large hem, every product can easily be lengthened by 5 cm.

The following overview helps you find the perfect inside leg length.

	Minus (short) -5	Standard	Plus (long) +5
Inside leg length:	75 cm	81 cm	87 cm
Length with large hem:	80 cm	86 cm	92 cm
