

DASSY®

FITS THE JOB

EN

MEET DASSY® – a new beginning

DASSY®

FITS THE JOB

Hey, remember us? As you can see, we look a little bit different. We've refreshed our logo and also added a new twist to our photos. This way, our visual style fits who we are even better.

Why green? Green stands for growth. And that's what DASSY's going for with this new look. What's more, green radiates safety, which also happens to be one of our main goals. We strive to be a safe and reliable partner for everyone who works with us and wears our clothing. Perhaps green also reminds you of nature? Rightly so, because sustainable business with respect for people and the environment is of great importance to DASSY®.

And what about the new logo? We're putting 'DASSY®' in a timeless yet energetic font. Were you a fan of the arrows in our old logo? In our new logo too, you'll find a little arrow in the letter D. It may seem like a small detail, but the position of the arrow was chosen with a purpose. It emphasises that DASSY® is going full steam ahead with its arrows aimed at a successful future.

Of course, this called for new photos as well. From now on, you'll be able to link DASSY to real faces. Real people. Each person exudes passion for the profession. So now we've updated our look and feel to make it more dynamic. **And what about our values and norms?** These remain unchanged. And we are very proud of that.

INDEX

WHO WE ARE

PASSION FOR THE PROFESSION

From the very beginning, we have felt a “passion for the profession” at DASSY®. Not just our own, but also that of our customers.

We understand better than anyone what craftsmen and craftswomen really need. That is why we have been developing comfortable, practical and attractive workwear for 15 years. Our dedication to the job translates into every step of the production process. From design to production and from launch to sale. Innovation is in our DNA, sustainable business is a must for us. In short, we are committed every day to developing workwear in which professionals can give their all.

The common thread throughout our story? We strive for the highest quality. We ensure that every garment lives up to the highest standards. Because those who feel a love for the job are only satisfied when it fits really well.

With our workwear, we strive for comfort in the workplace and safety where necessary. And of course we do not do this alone. **We work together with loyal partners who diligently help build our story.** Our dealers provide customers with the best service. And all expert employees in our own production centre in Sri Lanka give the best of themselves every day.

The passion and dedication that connects our employees, partners and customers is the basis of who we are. We have a new look, but we remain our authentic selves. With us, what you see is what you get and we're proud of that.

At DASSY®, you don't just find workwear. You'll find 100% passion. And we use that passion to fuel your passion for the job.

QUALITY

DASSY stands for quality. From raw materials to finished garments. We carefully monitor the quality of our collections at every stage of the production process. An added bonus: we carry out the entire production process ourselves. From design to production and from finishing to distribution.

Only the best materials

Our quality process begins with the raw materials. We set strict quality and finishing requirements from the outset. From the fabric and yarn to the buttons and zippers, all components undergo rigorous **quality control**. We do a lot of testing in our own laboratory at our production site in Sri Lanka. Thanks to the high-quality materials, our workwear is easy to care for and each garment lasts a long time.

In addition, all our collections meet the **OEKO-TEX® Standard 100**. All our workwear is 100% free from harmful substances or chemicals.

Manufacturing at the highest level

We closely monitor the production process at every stage to ensure that the highest standards are met.

New employees at our production centre undergo intensive training at a **specialty developed training centre**. This is where they learn all the tricks of the trade.

To ensure 100% quality during the production process, we carry out various **quality checks** on the production lines. The semi-finished garment is inspected in the middle of each line. At the end of the line, the finished garment is inspected once again. This ensures that a garment passes every stage of production with flying colours.

Did you know that our production centre is **highly automated**? For example, we use automatic sewing machines. This ensures consistent quality.

Tested and approved

In addition, **external testing centres** carry out additional quality inspections. Independent, recognised bodies check that our products meet the specified requirements for water resistance, tensile strength, abrasion, etc.

Notified bodies issue certificates so that professionals can use our workwear in complete safety. This is how we guarantee top quality and compliance with all European norms and standards.

Getting DASSY® to your doorstep!

Finally, our containers are 'loose loaded'. We transport our garments without using pallets, film or plastic straps. This allows more items to fit in each container and is more environmentally friendly.

Once the containers arrive in Bruges, we store all the DASSY products in our state-of-the-art warehouse. Thanks to the automated processes in our distribution centre, we can supply our dealer network quickly and efficiently.

DASSY® FLUX Painters

FUNCTIONALITY

Our workwear is expertly designed and continuously tested for specific work situations. For example, the independent **DASSY® Test Team** provides a comprehensive assessment of the functionality of our garments. These professionals test the workwear day in, day out, in their working conditions. Strong enough? Are there enough pockets in the right places? Comfortable enough to wear? They give their feedback to our R&D team and the Product Manager. Based on that feedback, we go back to work until we get it absolutely right.

Workwear that fits perfectly is more practical, safer and much more comfortable.

There's no end to the features we offer: detachable hoods, an extendable hem, the adjustable elasticated waistband at the back, and our different inside leg lengths (Standard, Minus and Plus). Our garments are also designed to withstand all kinds of weather conditions: dark, cold, rain and wind, as well as rising temperatures. You're always protected!

VERSATILITY

Good design is essential in our design process. We also translate our sustainability goals into our collections. Instead of following passing trends, we deliberately choose timeless and pure designs that you can combine year after year across collections. Moreover, everything in a collection can be combined thanks to a well thought-out design line and well-chosen colour schemes. Our colours are classic and timeless, with subtle accents and details that always suit a contemporary look. **Let's mix & match!**

RECOGNISABILITY

Our range is well-defined and suitable for dressing different categories of employees in a company, regardless of their position. We offer a range of products for both men and women, and we dress employees in a variety of sectors working in different weather conditions all year round.

Our collections are put together in a very recognisable way. Do you need classic work trousers, work trousers with knee pockets or work trousers with knee and holster pockets? One thing's for sure, you'll find it at DASSY®. We complement our range of work trousers with a variety of topwear, from outer layers to base layers. Accessories and safety shoes are also part of our range. You'll be safe from head to toe with DASSY®.

OUR SUSTAINABILITY VISION

We present to you all the efforts made by DASSY® at present to assume its social responsibility. What do we stand for? How do we develop and produce our products? Who makes our workwear? And where is all this done? These are the questions that are being increasingly directed to us, and rightly so. Therefore, we would like to give you an idea of what corporate sustainability means to us.

OUR AMBITION

Planet

We strive for a circular clothing industry. We actively work on developing solutions to reduce our emissions and we eliminate harmful chemicals and unsustainable materials from our production process.

People

Safety is always our top priority. Safety for the users of our workwear, safety shoes and accessories. And safety for all the stakeholders we interact with throughout the supply chain.

Prosperity

We work day in and day out to create an ethical, transparent and fair industry. That is the only way forward.

Partnerships

And lastly, we believe the only way to achieve these goals is through partnerships. By working with the right partners and establishing lasting relationships with our stakeholders, we will increase our chances of success and deliver on our promise. Goal by goal, one action at a time.

SUSTAINABLE DEVELOPMENT GOALS

Doing business sustainably, with attention to people and the environment, is essential today and can no longer be seen as an optional responsibility. What is DASSY® doing in this area? Our actions in this area are carried out within the framework of the Sustainable Development Goals (SDGs) developed by the United Nations. The SDGs consist of 17 goals linked to 169 targets. Together, they form an action plan to put the planet back on course toward sustainability.

Below we highlight **the goals on which we have a direct impact and we also explain the specific actions taken by us.**

PRESENT SITUATION

Good health and well-being

For us, nothing is more important than the good health and well-being of our employees, customers and stakeholders. Whether it involves our products or work environment, we believe in putting our best foot forward to meet the SDG 3 targets.

Working safely in sometimes dangerous conditions – that's our goal. With our clothing, we protect every professional from workplace risks. This is why we resolutely opt for excellent, high-quality materials. For example, we only work with raw materials with the OEKO-TEX® Standard 100 label: every component of our clothing is produced by our suppliers without using any harmful substances. Our clothing is therefore fully OEKO-TEX® certified. As a result, we also comply with the European Union's REACH regulation, which sets out strict rules regarding the use of chemicals. This is because we want to protect the skin and health of every person who wears our clothing.

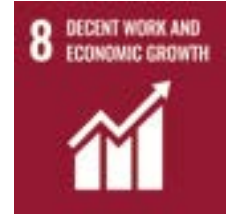

Moreover, the well-being of our employees is our highest priority, and we ensure this through our healthy and inspiring working conditions. For this, we pay attention to the maintenance of our machines, medical care, protective equipment for our employees, ergonomics, etc.

Decent work and economic growth

Social compliance is a very important KPI for us. We safeguard both human rights and labour rights because our employees are our most valuable asset. We are aware of the risks prevalent in our industry and we have the necessary knowledge and tools to deal with them. Our due diligence and HR policies help us ensure a better clothing industry. Besides the relevant policies and a code of conduct, we also have a grievance system at our production centre in Sri Lanka, strict controls on our working conditions, training programmes, etc.

In addition, over the years, our GP Garments production centre has been able to add several important certificates and awards to its list of honours, such as the annual Garments without Guilt certificate, the Amfori BSCI certification and the Social Dialogue & Workplace Cooperation Award.

Responsible consumption and production

All forms of clothing production have an impact on our planet. Naturally, it is no different in the case of DASSY®. We take responsibility for this and continue to improve. At DASSY®, we think carefully about ways to minimise our ecological footprint. In addition, we appeal to the awareness among employees regarding such issues and involve them in our sustainability efforts.

Here we share with you some specific examples of our efforts that contribute to responsible production. In both Bruges and Sri Lanka, we have our own recycling park. We also use specific IT systems to optimise our stock levels to avoid unnecessary production. But above all: when developing our clothing, we always go for the best quality. What's the essence of responsible production? Workwear that lasts longer! We devote a great deal of time to developing our designs, fabrics and production methods, conducting lab and field tests, performing maintenance activities, etc.

Climate change

Climate change is one of the greatest concerns of our time. From 'cradle to gate' – in other words, from the creation of a product until it leaves our warehouse – our products require energy. They leave a footprint at every step of the production process. We prioritise green practices to limit this footprint, both in our offices and in the warehouse. We do this by committing to green energy.

By 2017, we had already installed 860 m² of solar panels on our roof, i.e. a total of 430 panels, accounting for a capacity of 148 kWp. Today, there are an additional 554 panels or 1108 m², good for a capacity of 216 kWp. There are also plans to install solar panels at GP Garments. We are currently looking into how we can implement this.

In addition, we are replacing our entire vehicle fleet with electric cars, and we offer employees the opportunity to lease an electric or other type of bike. In this way, we encourage them to opt for a bike rather than using their car.

Furthermore, we focus on efficient transportation. For example, all our boxes are made of 100% recycled carton and are passed through a box sealing machine, which ensures that we transport less air. Since 2021, we transport loose-loaded containers from Sri Lanka to Bruges: completely without pallets, foil or plastic straps. In this way, more items can be fitted into a single container, making it more environmentally friendly.

Partnerships for the goals

We are convinced that teamwork is the only way to overcome the many challenges. For this, we collaborate with numerous organisations and other companies. Together with our partners Febelsafe, Centexbel, Amfori BSCI, SGS and many other notified bodies, we guarantee that all garments meet the highest industry standards.

We are also members of Ellie.Connect, which is a platform that brings together international textile sector players to think about a circular future and to motivate them to work toward this.

Furthermore, we think it is extremely important to build long-term, sustainable relationships with all our suppliers. This is how we create trust and support so that we can work together to improve the sector from within.

PLANS FOR TOMORROW

We realise that our entire sector still has a long way to go. At DASSY, we assume our responsibility to the fullest extent. We are now at the start of an undoubtedly exciting, but highly complex journey, filled with challenges.

Do you have further questions about our CSR policy? If so, please contact our CSR Officer at csr@dassy.eu

DASSY® WORKWEAR

NEW

ViVid

STAND OUT

A vibrant collection, that's DASSY® ViVid. We are launching a new, fresh colour palette alongside our familiar colours, combined with new fabrics and textures. We are also taking an important step towards sustainability through our choice of fabrics, zippers and buttons. What makes this collection unique? Each garment is partly made from recycled materials. We are also introducing a minimalist design with an engineered fit. We want you to feel completely yourself in our clothes. Feel free and energetic with DASSY® ViVid. We encourage you to express your unique identity. That's why we've included 'id' in the name.

A vibrant collection needs vibrant product names. That's why each garment is named after a national park teeming with life. You'll notice V-lines in every garment. The 'V' in ViVid is a little nod to this innovative detail.

DASSY® NORDIX

Wind and waterproof yet breathable? Check! The Nordix stretch winter jacket looks as good on a winter holiday as it does in the wintry workplace. Ready to brave the biting cold, cutting wind or endless rain and snow?

Retains body heat for hours thanks to the insulating quilted lining in premium DuPont™ Sorona® fibre.

Keeps rain and snow out thanks to a waterproof membrane, DWR finish and 100% taped seams.

Keeps the wind out thanks to a windproof membrane, storm flap on the zippers and storm cuffs on the wristbands.

Added bonus: perspiration is wicked away quickly thanks to the breathable membrane and lining.

DASSY® WORKWEAR

NEW

LOGIX

IN THE SPOTLIGHTS

DASSY® Logix is a collection focused on the logistics sector, warehousing and transport. The fluorescent fabric make you visible during the day, and reflective details put you in the spotlight when it's dark.

The port is undoubtedly the heart of the logistics sector. That's why each garment bears the name of a major or minor port city.

The 'X' is a subtle reference to the D-FX Flex collection. The basis for DASSY® Logix. This collection also includes trousers in mechanical stretch with inserts and topwear from Logix combines perfectly with D-FX Flex.

DASSY® WORKWEAR

DENIM

JEANS PLEASE

A collection for every jeans lover, that's DASSY® Denim. Jeans are everyone's favourite, both in their leisure time and at work. But casual jeans are not equipped for the challenges of the workplace. That's where a pair of DASSY® work jeans makes all the difference. Take on the challenges of your workplace with trendy work trousers in 2-way or 4-way stretch. Trendy doesn't mean we've sacrificed functionality. Every pair of jeans has plenty of pockets reinforced with Cordura®.

HOLY TRINITY

TIP

DASSY® FELIX / DASSY® SEATTLE

Classic work trousers. Work trousers with knee pockets for working on your knees. Or work trousers with knee and holster pockets to store all your tools? Our range of work trousers consists of 3 excellent products each.

ADJUSTABLE BACK ELASTIC

Thanks to the adjustable back elastic, your work trousers fit nicely around the waist. Your work trousers will no longer fall down!

EXTENDIBLE HEM

Extend your work trousers or (brace) overalls by 5 cm. Loosen 1 seam in the hem and, there you go, your trousers are immediately several centimetres longer. And still beautifully finished.

DASSY®

DASSY® WORKWEAR

THERMAL

YOUR SECOND SKIN

A collection that never leaves you out in the cold, that's DASSY® Thermal. The ideal base layer for all professionals. Soft to the touch, highly breathable and moisture wicking thanks to ventilation zones.

Wrap yourself in Thermal from head to toe and you'll stay wonderfully warm. Choose Thermal Active for work that involves movement, or Thermal Merino for work that involves sitting, kneeling or driving.

DASSY® WORKWEAR

SIZES

Each country has its own system of measurements. This can make it difficult to choose the right size. The overview below will guide you through all the possible sizes for each garment.

Most of our collections are a great fit for men and women alike. However, we also have models that are specifically designed for a woman's silhouette. That's why the Classic, D-FX Flex and Logix collections have different size charts for men, women and children.

FIND THE RIGHT SIZE IN DASSY® WORKWEAR

DIFFERENT INSIDE LEG LENGTHS

Almost all work trousers are available in different lengths: Minus with 75 cm or 30", Standard with 81 cm or 32" and Plus with 87 cm or 34". This ensures that the functional pockets are always in the right place.

EXTENDABLE HEM

You can lengthen almost all our work trousers, brace overalls and overalls in no time thanks to the handy extendable hem. Loosen the first hem and extend your trousers by 5 cm or 2 inches. The result? Longer trousers, but still with a neatly finished hem.

	Minus -6 cm -2"	Standard	Plus +6 cm +2"
Inside leg length	75 cm 30"	81 cm 32"	87 cm 34"
Length with large hem	80 cm 31"	86 cm 34"	92 cm 36"

Plus and Minus are available in the following sizes:

BE FR ES PT from size 40 to 54
DE NL PL HR IT CZ from size 46 to 58
FI SE DK NO EE LT LV IS from size C46 to C58
UK from size 31 to 43 and UK denim from size 28 to 42

SPECIAL SIZES

We have the most common sizes in stock. Would you like a smaller or larger size? Or looking for specific women's models? We can help, with a small surcharge on your order. Please note that this may mean a slightly longer delivery time. Ask us for advice, we'll be happy to help.

TAKING MEASUREMENTS

Sizes nemen?

Wondering how to take your measurements? Follow the drawing from step B to D. Measure as close to the skin as possible. Make sure you hold the tape measure close to your body. In step B, allow a finger's width of extra space so that your trousers are not too tight. Mind your units: either measure everything in inches or centimetres.

Will someone else be taking your measurements?

Make sure you stand up straight with your legs slightly apart.

B Measure around your waist where you wear your trousers.

C If you wish, you can also measure your hips at the widest point.

D Measure your inside leg length: from the desired crotch seam to the desired length of the trousers.

FIND THE RIGHT SIZE IN DASSY®-TOPWEAR

A Measure your chest (A) at the widest point.

Attention: looking for the right size in DASSY safety workwear? Then go to page 128.

SIZES

Each country has its own system of measurements. This can make it difficult to choose the right size. The overview below will guide you through all the possible sizes for each garment.

A. Chest measurement

B. Waist measurement

C. Inside leg length

DASSY® SAFETY WORKWEAR FITS LIKE A GLOVE

DIFFERENT INSIDE LEG LENGTHS

Almost all work trousers are available in different lengths: Minus with 75 cm or 30", Standard with 81 cm or 32" and Plus with 87 cm or 34". This ensures that the functional pockets are always in the right place.

EXTENDABLE HEM

You can lengthen almost all our work trousers, brace overalls and overalls in no time thanks to the handy extendable hem. Loosen the first hem and extend your trousers by 5 cm or 2 inches. The result? Longer trousers, but still with a neatly finished hem.

	Minus -6 cm -2"	Standard	Plus +6 cm +2"
Inside leg length	75 cm 30"	81 cm 32"	87 cm 34"
Length with large hem	80 cm 31"	86 cm 34"	92 cm 36"

Plus and Minus are available in the following sizes:

BE FR ES PT from size 40 to 54

DE NL PL HR IT CZ from size 46 to 58

FI SE DK NO EE LT LV IS from size C46 to C58

UK from size 31 to 43 and UK denim from size 28 to 42

SPECIAL SIZES

We have the most common sizes in stock. Would you like a smaller or larger size? Or looking for specific women's models? We can help, with a small surcharge on your order. Please note that this may mean a slightly longer delivery time. Ask us for advice, we'll be happy to help.

TAKING MEASUREMENTS

Sizes nemen?

Wondering how to take your measurements? Follow the drawing from step B to D. Measure as close to the skin as possible. Make sure you hold the tape measure close to your body. In step B, allow a finger's width of extra space so that your trousers are not too tight. Mind your units: either measure everything in inches or centimetres.

Will someone else be taking your measurements?

Make sure you stand up straight with your legs slightly apart.

B Measure around your waist where you wear your trousers.

C If you wish, you can also measure your hips at the widest point.

FIND THE RIGHT SIZE IN DASSY®-TOPWEAR

A Measure your chest (A) at the widest point.

SAFETY WORKWEAR

SAFETY SHOES

WALK THE TALK

A safe outfit from head to toe. Because your feet need quality protection too. That's possible with DASSY® Safety Shoes, 100% made in Italy. A good safety shoe not only provides the necessary protection, but is also light, flexible and comfortable. In any workplace, in any season and for any profession.

DASSY®
NOX S3 › LOWCUT SAFETY SHOE 10011

Antistatic (A), metal free, breathable, shock absorbing heels (E), oil and petrol resistant sole (FO), anti-slip outsole (SRC), ESD, water-repellent (WRU), anatomically shaped footbed, scuff toecap

Upper	Textile		
Lining	Plasmafeel®		
Safety toecap	Composite		
Insole	Removable Antibacterial Absorbent		
Midsole	Zero perforation Synthetic		
Exterior sole	PU PU		
Certification	UNI EN ISO 20345:2012 DGUV 112-191 SRC		
Colour	Azure blue/black	Model	Lowcut
	Anthracite grey/black		
Sizes	EU 36-48 UK 3-13	Fastener	Laces

DASSY®
LEOS › FLAT LACES (PER 5 PAIR) 800075

Available in 120 cm and 150 cm, suitable for the following DASSY® shoes: Sparta and Corus

Fabric - 65% polyester/35% polyamide

Colour - black

0704

DASSY®
CERES › ROUND LACES (PER 5 PAIR) 800063

Length 130 cm - suitable for the following DASSY® shoes Amon, Anubis and Horus
Length 150 cm - suitable for the DASSY® Seth

Fabric - 65% polyester/35% polyamide

Colour - zwart

0704

DASSY®
ARES › INSOLE (PER PAIR) 800055

Antistatic, antibacterial treatment, shock absorbing, sold per pair, suitable for all DASSY® shoes

Fabric - polyester/latex/polyethylene

Sizes - EU 36-46 | UK 3-13

FABRICS

Quality starts with the choice of fabric. At DASSY®, we carefully select each fabric to suit a specific garment. For example, all our collections are OEKO-TEX® Standard 100. All our workwear is 100% free of harmful substances.

Do you want to know about the technical properties of our fabrics? Below you will find a detailed overview.

SUSTAINABLE FABRICS

Fabric code	Fabric name	Commercial name	Composition	Weight	Properties
5005	PA 05	Cordura®	100% polyamide	±220 g/m ²	Cordura® is a superior, durable polyamide fibre and reinforces vulnerable parts of garments. This is how we guarantee a longer service life. Cordura® retains its shape and is water- and dirt-repellent.
5006	PA 06	Cordura®	100% polyamide	±285 g/m ²	
5007	PA 07	Cordura® stretch	92% polyamide – 8% elastane	±350 g/m ²	Cordura® stretch reinforces vulnerable parts of garments. It makes our workwear last longer. The 4-way stretch ensures total flexibility.
5101	PASPA 01	Cordura® stretch for inserts	88% polyamide – 12% elastane	±260 g/m ²	This Cordura® stretch is a superior, durable ripstop which we use in our inserts. The 4-way stretch inserts are applied in strategic places. This is how we guarantee ultimate freedom of movement.
5230	PACOSPA 30	superstretch	62% polyamide – 29% cotton – 9% elastane	±210 g/m ²	Superstretch is a 4-way stretch in double weave. The cotton on the inside feels extra soft on the skin. The fabric holds its shape well thanks to the elastane, also after plenty of wash cycles. Thanks to the water repellent finish, clothing with superstretch is ideal to face rainy days.
2061	PESCO 61	polyester cotton	65% polyester – 35% cotton	±245 g/m ²	Polyester cotton is a durable and wear-resistant twill fabric. Nice benefit: the high colour fastness, even in case of regular washing.
2064	PESCO 64	polyester cotton	65% polyester – 35% cotton	±300 g/m ²	Assets of PESCO 41: extra supple finish for improved wearing comfort and the light, horizontal mechanical stretch for increased freedom of movement.
2041	PESCO 41	polyester cotton	65% polyester – 35% cotton	±245 g/m ²	
2063	PESCO 63	polyester cotton	65% polyester – 35% cotton	±250 g/m ²	Assets of PESCO 63: the water-repellent finish and the light, horizontal mechanical stretch for increased freedom of movement.
3060	COPEs 60	cotton polyester	60% cotton – 40% polyester	±340 g/m ²	Polyester cotton is a durable and wear-resistant canvas fabric. The light, horizontal mechanical stretch allows for increased freedom of movement.
1043	CO 43	cotton	100% cotton	±320 g/m ²	Cotton is a durable and wear-resistant twill fabric. The fabric is great to wear thanks to its insulating and ventilating properties. Note that cotton is susceptible to shrinkage during the first few washes.
3093	COPEs 93	denim	80% BCI-cotton – 18% polyester – 2% elastane	±350 g/m ² 10,25 oz/y ²	4-way stretch denim for ultimate freedom of movement. The washing ensures increased softness & flexibility.
1094	CO 94	denim	91% cotton – 8% polyester – 1% elastane	±390 g/m ² 11,5 oz/y ²	2-way stretch denim for extra comfort. The washing ensures increased softness & flexibility.
2017	PESCO 17	beaver	70% polyester – 30% cotton	±240 g/m ²	Beaver is dust- and water-repellent, making sure the fabric stays beautiful for longer. The material is quick-drying, strong and crease-resistant.

FABRICS WITH RECYCLED CONTENT

Fabric code	Fabric name	Commercial name	Composition	Weight	Properties
3048	COPEs 48	cotton – recycled polyester	55% cotton – 45% recycled polyester	±200 g/m ²	This antibacterial fabric for knitwear is designed with the brrrr [®] Triple Chill Effect technology. This guarantees a cooling effect, easy moisture-wicking and quick drying. In addition, the cotton-recycled polyester is treated for an anti-pilling finish. Bye-bye fluff balls! Finally, this fabric is PFC-free, with no intentional use of PFCs.
4109	PESPA 09	recycled polyester – polyamide	76% recycled polyester – 24% polyamide	±200 g/m ²	This antibacterial fabric for knitwear features a subtle geometric design. Recycled polyester/polyamide easily wicks away moisture and is PFC-free, with no intentional use of PFCs.
2087	PESCO 87	recycled polyester – cotton	64% recycled polyester – 36% cotton	±310 g/m ²	This knitwear fabric is brushed on the inside. Wonderfully soft, warm and comfortable! In addition, the recycled polyester-cotton is treated for an anti-pilling finish. Bye-bye fluff balls! Finally, this fabric is PFC-free, with no intentional use of PFCs.
2038	PESCO 38	recycled polyester – cotton	51% recycled polyester – 6% polyester – 34% BCI cotton – 9% elastomultiester	±250 g/m ²	Recycled polyester-cotton is a woven, durable and wear-resistant fabric with ripstop for extra strength. The 2-way stretch allows for sufficient comfort and ease of movement. This fabric is PFC-free, with no intentional use of PFCs.
5102	PASPA 02	Cordura [®] stretch for knee pads	90% PA66 Cordura [®] (virgin) – 10% spandex	±350 g/m ²	Woven fabric with superior durability thanks to Cordura [®] yarns. In 4-way stretch for ultimate freedom of movement. With ripstop to reinforce the knee pockets and ensure wear resistance. This fabric is PFC-free, with no intentional use of PFCs.
2114	PESSPA 14	recycled polyester – elastane	66% recycled polyester – 26% polyester – 8% elastane	±280 g/m ²	Diamond-textured knit. Brushed on the inside, making it wonderfully soft, warm and comfortable! In 4-way stretch for ultimate freedom of movement. Treated for a PFC-free, durable, water-repellent finish and the fabric is also PFC-free, with no intentional use of PFCs.
4083	PES 83	recycled polyester	100% recycled polyester	±90 g/m ²	Recycled polyester with twill weave is a very lightweight, windproof fabric with mechanical stretch. Features wear-resistant ripstop. Treated for a PFC-free, durable, water-repellent finish and the fabric is also PFC-free, with no intentional use of PFCs.
4081	PES 81	recycled polyester	100% recycled polyester	±170 g/m ²	Recycled polyester is a lightweight, windproof and waterproof fabric with mechanical stretch. Has a breathable PU membrane. Treated for a PFC-free, durable, water-repellent finish and the fabric is also PFC-free, with no intentional use of PFCs.
4084	PES 84	recycled polyester	100% recycled polyester	±160 g/m ²	Recycled polyester is a lightweight, windproof and waterproof fabric with mechanical stretch. With wear-resistant ripstop and a breathable PU membrane. Treated for a PFC-free, durable, water-repellent finish and the fabric is also PFC-free, with no intentional use of PFCs.
5114	PASPA 14	polyamide – elastane	50% recycled polyester – 44% polyamide – 6% elastane	±280 g/m ²	A double-layered diamond-textured softshell in 4-way stretch for increased ease of movement. In fleece for extra comfort and warmth on the inside. Treated for a PFC-free, durable, water-repellent finish and the fabric is also PFC-free, with no intentional use of PFCs.
5309	PAPES 09	polyamide – recycled polyester	60% gerecycleerde polyamide – 40% recycled polyester	±163 g/m ²	Melange fabric with two-tone effect. Creates a modern look. With antibacterial finish and PFC-free, with no intentional use.

WATERPERFORMANCE FABRICS

Fabric code	Fabric name	Commercial name	Composition	Weight	Properties
4021	PES 21	three-layered softshell	100% polyester	±280 g/m ²	A three-layered softshell consisting of a woven outer layer, a breathing membrane and inner layer fleece lining. The fabric is waterproof thanks to its water-repellent treatment, windproof and ventilates well when perspiring. Besides, the fabric is slightly elastic for increased freedom of movement.
4074	PES 74	three-layered HiVis softshell	100% polyester	±280 g/m ²	A three-layered softshell consisting of a woven HiVis outer layer, a breathing membrane and inner layer fleece lining. The fabric is waterproof thanks to its water-repellent treatment, windproof and ventilates well when perspiring. Besides, the fabric is slightly elastic for increased freedom of movement.
4070	PES 70	coated polyester	100% polyester – PU-coating	±200 g/m ²	Coated polyester is windproof and waterproof thanks to its water-repellent treatment. Breathable polyurethane (PU) coating allows transpiration moisture to evaporate.
4080	PES 80	laminated polyester	100% polyester – TPU-lamination	±200 g/m ²	Laminated polyester in Oxford weave is windproof and waterproof thanks to its water-repellent treatment. The breathable membrane with thermoplastic polyurethane (TPU) lamination allows transpiration moisture to evaporate.
4090	PES 90	laminated polyester	100% polyester – TPU-lamination	±240 g/m ²	Laminated polyester in canvas weave is windproof and waterproof thanks to its water-repellent treatment. The breathable membrane with thermoplastic polyurethane lamination allows transpiration moisture to evaporate.
5194	PASPA 94	laminated polyamide with elastane	88% polyamide – 12% elastane DWR-lamination	±200 g/m ²	Laminated polyester with elastane is windproof and waterproof thanks to its water-repellent treatment. The breathable membrane allows transpiration moisture to evaporate. Additional benefit: 4-way stretch for ultimate freedom of movement.

KNITWEAR

Fabric code	Fabric name	Commercial name	Composition	Weight	Properties
1006	CO 06	cotton single jersey	100% cotton	±180 g/m ²	Cotton is a natural, strong and durable fibre. The fabric breathes and is very light, which makes cotton nice to wear. Note that cotton is susceptible to shrinkage during the first few washes.
1104	COSPA 04	cotton single jersey with elastane	92% cotton – 8% elastane	±190 g/m ²	Single jersey cotton with elastane, pre-shrunk fabric which is also extra flexible. The fabric consists of combed cotton, making the yarns soft and supple to the touch.
1105	COSPA 05			±220 g/m ²	
1146	COSPA 46	cotton piqué with elastane	97% cotton – 3% elastane	±220 g/m ²	Cotton piqué with elastane is a breathable, durable and easy-care fabric. Plus: the fabric is less susceptible to shrinkage during the first washes.
3016	COPES 16	blend single jersey	50% cotton – 50% polyester	±185 g/m ²	Blend single jersey and blend polo piqué are very hard-wearing and high colourfast fabrics. Fabrics are suited for industrial washing at 75° according to PRO label. During the production, both fabrics were pre-shrunk, and therefore resistant to shrinking.
3056	COPES 56	blend polo piqué		±215 g/m ²	
3080	COPES 80	sweatshirt fabric	80% cotton – 20% polyester	±290 g/m ²	Sweatshirt fabric combed inside for improved comfort and warmth.
3086	COPES 86		65% cotton – 35% polyester	±305 g/m ²	The fabric has a double-sided even appearance due to Interlock and feels smooth on the skin.
3090	COPES 90		80% cotton – 20% polyester	±340 g/m ²	Sweatshirt fabric combed inside for improved comfort and warmth.
4016	PES 16	micro polar fleece	100% polyester	±260 g/m ²	Micro polar fleece is combed inside and outside for improved comfort and warmth. The fabric also underwent an anti-pilling treatment, so say goodbye to fluffs.
4038	PES 38	tricot fleece	100% polyester	±290 g/m ²	Tricot fleece is combed in one colour inside and outside for improved comfort and warmth. The outer fabric is a melange tricot for a modern look.
4004	PES 04	polyester bird eye	100% polyester	±140 g/m ²	Polyester bird eye and polyester piqué are quick drying, inherently antibacterial fabrics. The fabrics offer UV protection (UPF 50+) against the radiation of the sun.
4044	PES 44	polyester piqué		±215 g/m ²	
9201	WOPA 01	thermal merino	75% merino wool – 25% polyamide	±180 g/m ²	Thermal merino has a woven-in design (jacquard) and fits closely to the body thanks to 4-way stretch. The fabric consists of antibacterial merino, ideal for avoiding odours. Furthermore, the fabric is extra warm, moisture-wicking, thermoregulating and quick-drying.
9101	PPPAEA 01	thermal active	70% polypropylene Siltex – 22% polyamide – 8% elastane	±145 g/m ²	Thermal active has a woven-in design (jacquard) and fits closely to the body thanks to 4-way stretch. The fabric consists of antibacterial PROLEN® Siltex, ideal for avoiding odours. Furthermore, the fabric is moisture-wicking, thermoregulating and quick-drying.

SAFETY FABRICS

Fabric code	Fabric name	Commercial name	Composition	Weight	Properties
2070	PESCO 70	HiVis polyester cotton	69% polyester – 31% cotton	±250 g/m ²	HiVis polyester cotton is a durable and wear-resistant twill fabric. Clothing made of HiVis polyester cotton can take a beating, as the fabric is dirt-repellent treated. Extra advantage with PESCO70: the fabric is very light.
2074	PESCO 74	HiVis polyester cotton	60% polyester – 40% cotton	±290 g/m ²	
2176	PESCOSPA 76	HiVis polyester cotton stretch	70% polyester – 28% cotton – 2% elastane	±270 g/m ²	HiVis polyester cotton is a durable and wear-resistant twill fabric. Clothing made of HiVis polyester cotton can take a beating, as the fabric is dirt-repellent treated. The 2-way stretch allows for extra comfort.
2084	PESCO 84	HiVis sweatshirt fabric	65% polyester – 35% cotton	±280 g/m ²	The sweatshirt fabric is combed inside for improved comfort and warmth.
4012	PES 12	HiVis polar fleece	100% polyester	±280 g/m ²	The high visibility polar fleece is combed inside and outside for improved comfort and warmth. The fabric also underwent an anti-pilling treatment, so say goodbye to fluffs.
4006	PES 06	HiVis polyester bird eye	100% polyester	±150 g/m ²	HiVis polyester bird eye is a quick-drying, inherently antibacterial fabric. The fabric offers UV protection (UPF 50+) against the radiation of the sun.
3054	COPEs 54	HiVis cotton polyester piqué	55% cotton – 45% polyester	±170 g/m ²	High visibility cotton polyester is a quick-drying, inherently antibacterial fabric. The fabric offers UV protection (UPF 50+) against the radiation of the sun.
1073	CO 73	flame-retardant cotton	100% cotton	±340 g/m ²	Flame-retardant cotton is a fabric of European origin with flame-retardant finish. Safety first.
3075	COPEs 75	Multinorm cotton polyester	75% cotton – 24% polyester – 1% Nega-Stat®	±290 g/m ²	(HiVis) Multinorm cotton polyester is a fabric of European origin with flame-retardant finish. Moreover, it is inherently antistatic: the flame-retardant properties are naturally present in the fibres. Safety at its very best.
3077	COPEs 77	HiVis-Multinorm cotton polyester	50% cotton – 49% polyester – 1% Nega-Stat®	±330 g/m ²	
2135	PESSPA 35	fleece with elastane	94% polyester – 6% elastane	±260 g/m ²	Fleece with elastane is extra flexible and combed on the inside for extra comfort and warmth. The fabric also underwent an anti-pilling treatment, so say goodbye to fluffs.
4074	PES 74	three-layered HiVis softshell	100% polyester	±280 g/m ²	A three-layered softshell consisting of a woven HiVis outer layer, a breathing membrane and inner layer fleece lining. The fabric is waterproof thanks to its water-repellent treatment, windproof and ventilates well when perspiring. Besides, the fabric is slightly elastic for increased freedom of movement.
4070	PES 70	coated polyester	100% polyester – PU-coating	±200 g/m ²	Coated polyester is windproof and waterproof thanks to its water-repellent treatment. Breathable polyurethane (PU) coating allows transpiration moisture to evaporate.

SPECIAL PROPERTIES OF OUR WORKWEAR

4-way stretch	Experience the ultimate freedom of movement with 4-way stretch. This stretch material is elastic in all directions. Extremely comfortable.
2-way stretch	Be flexible with 2-way stretch! This stretch fabric creates extra freedom of movement in 2 directions.
Cordura®	Thanks to Cordura®, workwear lasts even longer! The fibre reinforces the elbows, pockets and knee pockets of our garments.
Cordura® stretch	Cordura® stretch at the knees guarantees even more freedom of movement. Ideal for working on your knees!
Cordura® stretch inserts	Cordura® stretch inserts in strategic places such as the crotch, back of the knee and at the back below the waistband. For even more flexibility.
Waterproof fabric	Brave the rain with our waterproof fabrics. Water resistance (WR) expresses how much precipitation our fabrics can withstand before water penetrates it. The higher the WR, the longer you can continue working – unimpeded – during bad weather.
Windproof fabric	Work comfortably in strong winds, thanks to our windproof fabrics.
Breathable fabric	Breathable clothing is a must in hot and cold weather. Perspiration is wicked away faster. Moisture vapour permeability (MVP) expresses how breathable the fabric is, depending on the rate at which water vapour escapes. The higher the MVP, the stronger the breathability of the fabric.
UPF 50+	Clothing with UV protection protects you 98% against harmful UV radiation from the sun.
Antibacterial	Avoid odours with our antibacterial fabrics. Both with finish on top of the fabric, and inherently (naturally present in the fibres).
Extra light fabric	We design certain garments in different fabrics to suit your needs. Hot work environment or intensive work? Choose our extra-light fabric.

LIST OF ABBREVIATIONS

CO	Cotton	PES	Polyester
CV	Viscose (only for ViVid)	PP	Polypropylene
EA	Elastane	RCO	Recycled cotton (only for ViVid)
ELE	Elastomultiester – (only for ViVid)	RPA	Recycled polyamide (only for ViVid)
ELO	Elastofin	RPES	Recycled polyester (only for ViVid)
PA	Polyamide	WO	Wool
PAN	Acrylic fibre	DWR	Durable water repellent

DASSY® MANUAL

SAFETY STANDARDS

DASSY® Safety consists of several collections: DASSY® HiVis, DASSY® Multinorm, DASSY® HiVis Multinorm and DASSY® Flame Retardant. Different CE standards apply to each collection. These can be found on the label of each garment and are also described on the following pages.

Each standard describes specific test methods, safety classes, and requirements set at the European or international level. Some standards have multiple classes.

HIVIS

x **High visibility**
EN ISO 20471:2013+A1:2016

This safety clothing is designed to make the wearer more conspicuous during the day, at dusk and at night, as required by law for anyone working on/near roads and construction sites.

There are three classes of safety clothing. The surface area of fluorescent and reflective material on the garment determines the class. The larger the area, the higher the class and the more visible the wearer*. By combining different classes in a single outfit, you can obtain a higher class in specific cases. Always check the safety class required for your work situation and the resulting class for combinations.

		fluorescent material per m ²	reflective material per m ²
Class 1	Compulsory for anyone working on roads where vehicles travel at speeds of up to 30 km/h.	0,14 or more	0,10 or more
Class 2	Compulsory for anyone working on roads where vehicles travel at speeds of up to 60 km/h.	0,50 or more	0,13 or more
Class 3	Compulsory for anyone working on roads where vehicles travel at speeds in excess of 60 km/h. Also for those working on construction sites, train tracks and during rescue operations.	0,80 or more	0,20 or more

*Safety clothing can be personalised, but this reduces the surface area of the fluorescent material. This will affect the certification of the garment. DASSY® seeks prior approval from an approved body to ensure that the mandatory safety class applicable to you is achieved. Ask your safety adviser about the required safety classes. You can read more about personalising safety clothing on page 159.

COLD AND RAIN

Y
Y
Y
Y
Y

Protection against cool environments
EN 14058:2017
(air temperature $\geq -5^{\circ}\text{C}$)

Y (thermal resistance class 1- 4)
Y (air permeability class 1-3, if intended for outdoor use)
Y (thermal insulation tested with moving mannequin)
WP (water resistance class 1-2, optional)

Y
AP
WP

Protection against cold
EN 342:2017
(humidity + wind + air temperature $\leq -5^{\circ}\text{C}$)

Y(B) /Y(C) /Y(R): total insulation value
(letter corresponding to undergarments used for testing)
AP (air permeability class 1-3)
WP (water resistance class 1-4, optional)

To meet the above standards, garments must be worn closed. Adjust all the functionalities on your garments to ensure that cold cannot get through (e.g. zippers, cuffs and waistband).

The thermal insulation value of the garment may decrease when wet and after cleaning procedures.

*An 'X' means that the garment has not been tested for that particular characteristic.

X
X
X

Protection against rain
EN 343:2019

Y (water resistance class 1-4)
Y (thermal resistance class 1-4)
R (rain tower test on the finished garment, optional)

EN343 certified safety clothing protects against precipitation (rain, snow), fog and ground humidity. The garments and seams are tested for water resistance (classes 1-4) and water vapour permeability/breathability (classes 1-4).

KNEELING WORK

Protection for kneeling work EN 14404:2004+A1:2010

This standard describes the test methods and requirements for knee protectors for work in the kneeling position.

The DASSY knee pockets are certified in combination with DASSY® Cratos and DASSY® Fides knee pads. They offer Type 2, Level 1 protection. This means that the knee pads are suitable for flat and uneven surfaces and provide protection against the penetration of objects smaller than 1 cm.

DASSY® Cratos are our well-known certified knee pads. During the period covered by this catalogue, we also plan to introduce DASSY® Fides, our new certified knee pads.

UV RADIATION

Protection against UV radiation EN 13758-2:2003+A1:2006

Clothing certified to this standard helps protect against the sun's harmful rays. A UPF (Ultraviolet Protection Factor) of at least 50 provides the highest level of protection by blocking more

than 98% of the sun's harmful rays. The protection factor of the garment may be reduced after intensive use, stretching or if the garment is wet. Only covered parts of the body are protected. Uncovered parts of the body should be protected with a high factor sunscreen.

MULTINORM

Protection against liquid chemicals EN 13034:2005 +A1:2009

This standard is required for Type 6 safety clothing which provides protection against potential exposure to small amounts of splashes or light mists/sprays of chemical liquids and can be used in situations where the risks are low and a complete liquid permeation barrier is not required. This type of clothing should fully cover the upper and lower body.

Protection against the hazards of electric arcs IEC 61482-2:2018

An electric arc is similar to a lightning strike on an electrical system as a result of a fault (e.g. a short circuit) and can cause serious burns or other injuries. This standard is divided into several classes. Class 1 protects against an arc generated by a short circuit with 4 kA and an arcing time of 500 mS.

Protection against electrostatic discharges EN 1149-5:2018

Antistatic clothing is worn to prevent electrostatic discharges from creating sparks via the clothing, which can lead to fires or explosions. The standard (EN 1149) consists of several parts that specify requirements and test methods to measure protection against static electricity or damage caused by discharge. Part 5 of the standard (EN 1149-5) describes the performance requirements for antistatic clothing.

Protection during welding and related processes EN ISO 11611:2015

This standard defines the basic safety requirements and test methods for protective clothing designed to protect the wearer's body, including the head (hoods) and feet (gaiters), against welding spatter, brief contact with flames and radiant heat, and to minimise the risk of electric shock (in the event of accidental contact with ± 100 V). Flame spread is tested for surface flames (leading to A1) and edge flames (A2). Two classes are also defined for this standard, with the highest class (Class 2) providing protection against more hazardous welding techniques.

Protection against heat and flames EN ISO 11612:2015

This standard specifies the performance requirements for garments designed to protect the wearer's body (excluding the hands) from heat and fire. The standard defines different forms of protection, each identified by a letter and a performance index number (the higher the number, the better the protection).

- A: flame spread (2 levels)
- B: convective heat (3 levels)
- C: radiant heat (4 levels)
- D: aluminium splashes (3 levels)
- E: iron splashes (3 levels)
- F: contact heat (3 levels)

MAINTENANCE

Be sustainable by using the right washing and drying methods. It will also extend the lifespan and guarantee the functionality of your work clothes. So always follow the industrial or household symbols on the care label, which is tailored to the most delicate part of your garment.

Industrial or domestic laundry?

You are the expert in your field of work. Then why not leave the washing of your work clothes to professionals? They wash clothes on a much larger scale, have special washing and drying machines, and use the right detergents.

More than just good advice, we strongly recommend to always have safety clothing washed by a professional laundry service. For DASSY® HiVis and DASSY® Multinorm, look for the indication "max 50 cycles" on the CE label. Make sure to not exceed the maximum number of washes, as safety clothing must always comply with legal safety requirements.

Industrial laundry symbol

You will find this internationally recognised washing symbol on the washing label of all workwear specially developed for industrial washing and drying. These garments are tested and approved in accordance with EN ISO 15797:2017.

The numbers 1 to 8 represent the various test procedures: Do the clothes retain their shape? Are the seams abrasion-resistant? Is the material strong enough? Is the garment colourfast? We test at 75°C and 85°C, both in white wash PRO 4, and in coloured wash PRO 8. At the top right, we check whether the workwear to be dried can go into the tumble dryer, at the bottom right whether the workwear may go into the tunnel finisher for the drying process.

- Do not iron

Cleaning

- Dry cleaning
- Gentle process
- Do not dry-clean

TIP You will see our DASSY Quality Wash symbol here in the catalogue with all garments that have passed the shrinkage and colour fastness test at 75°C. This is how we test the quality of your garment. Always carefully follow the instructions on the washing label.

PERSONALISATION

Your team is your company's business card. That is why it's important that your team projects harmony and confidence. Your (potential) customer will feel more reassured and satisfied. Nice corporate clothing is essential if you want to build a good image.

Your team guarantees top quality. You can show that down to the last detail.

At DASSY® you will find everything you need for a professional total look. Choose a uniform corporate outfit from our wide range. Within this uniform look, you can apply our mix & match principle to suit your own taste and preferences.

Your logo in the spotlight

Promote your corporate brand, gain more brand awareness and increase sales? Show yourself and put your logo in the spotlight. Choose a highly visible place for maximum effect. On trousers, the logo will look best on the leg or back pocket. On a top, on the back or chest.

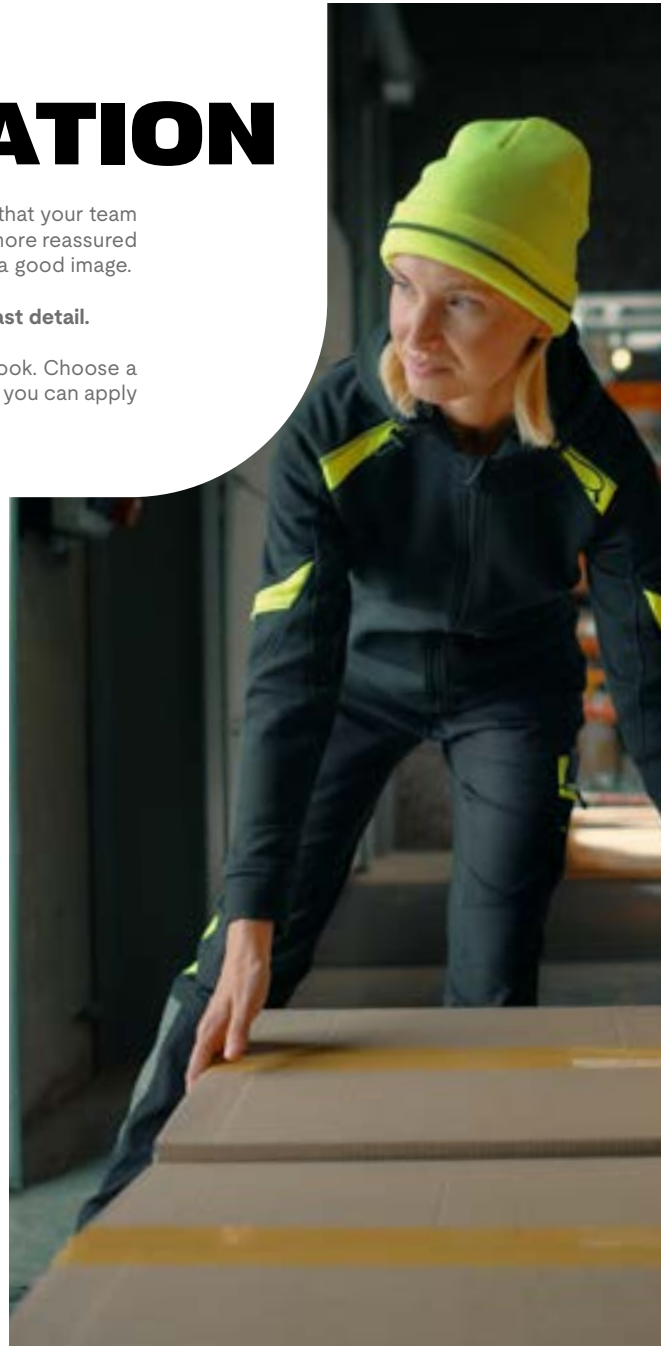

Choose the right technique

There are different techniques for applying a logo to clothing. Embroidery is perfect for fleece vests, but should not be chosen for work clothing that must remain waterproof. Heat transfer, on the other hand, can ensure that your workwear remains waterproof. Screen printing, digital screen printing or embroidery are ideal printing techniques for T-shirts and polo shirts.

Zipper inside back panel? Now that's convenient!

Specifically for printwork, there is a zipper at the bottom inside the back panel of jackets and body warmers. Now that's handy! This means the printer will only stretch the outer fabric over the printing plate. We protect your garment, as this way the other layers of the product remain intact and do not lose their properties. The result: a beautiful, even and high-quality print of your logo.

Please note! Not all materials are equally suitable for printing your logo. Feel free to ask your DASSY dealer for advice.

Personalise safety clothing?

Be aware that personalised HiVis garments may interfere with the compulsory classification. This is because the minimum surface area of fluorescent and reflective material is fixed in 3 classes. DASSY® seeks approval for the non-personalised garment from a recognised body in advance.

Do you need advice on whether these standards still hold up when we print your logo? Ask your safety adviser or dealer for advice.

Do you have questions about personalising our workwear? Or would you like to take your corporate outfit to the next level? Your DASSY dealer is always there for you.
