2025

EN

We are pleased to introduce the latest additions to our range of workwear, footwear, and protective equipment, set to arrive in our warehouse during the first half of 2025. These products are the result of long-term development by our designers, who have combined modern, attractive designs with innovative materials for maximum durability and environmental sustainability.

- New technologies for enhanced durability and user comfort
- Sustainable collections made from recycled materials
- Modern and attractive design

ECO CONCEPT

A GREAT STEP INTO THE FUTURE!

We have found a way to protect the environment and reduce the production of plastics and plastic fibres. By using fibres made from recycled PET bottles, we are helping to reduce plastic waste.

OUR ATTITUDE TO LIFE

We understand the importance of the demands on our ENVIRONMENT and are committed to contributing to its sustainability.

SUSTAINABILITY IN EVERY DETAIL

The Global Recycled Standard (GRS)

is an international, voluntary, full product standard that sets requirements for third-party certification of recycled input, chain of custody, social and environmental practices, and chemical restrictions. The primary goal of the GRS is to increase use of recycled materials in products and reduce the harmful social, environmental, and chemical impacts of production.

The Recycled Content Standard (RCS)

is an international, voluntary standard that sets requirements for third-party certification of recycled input and chain of custody. The primary goal of the RCS is to increase the use of recycled materials.

Less Waste, More Possibilities

We use recycled materials to help reduce plastic waste and give it a new life.

EN ISO 14001:2016

Confirms our commitment to efficient environmental management and minimizing our impact on the planet.

BARILE STS

PU / Vibram® Rubber

waterrepellent
membrane

UPPER MATERIALS

Among full-grain leathers, this is the most resilient and long-lasting. Owing to a special tanning process, it offers total water resistance. The subtle irregularities on its surface aren't flaws; they are distinctive traits that underscore the individual character of each item, reflecting the artisan craftsmanship of PANDA SAFETY's production.

Crafted from high-tenacity polyamide yarns, this fabric endows the uppers with remarkable resistance to tearing and abrasion ensuring enhanced durability; the footwear also benefits from the Jacquard textile's inherent lightness and breathability.

Natural leather with exceptional water-repellent properties, resistant to stains, abrasion, and the effects of extended UV exposure. Moreover, it boasts outstanding tensile strength.

LINING MATERIALS

Crafted from a threelayer fabric, this lining features a unique network of microchannels, ensuring unparalleled breathability. It's highly resistant to wear and tear, and its antimicrobial and antibacterial treatments effectively combat the growth of harmful microorganisms, also keeping unpleasant odours at bay.

Fabric that excels in breathability and wear resistance is specifically designed to swiftly absorb and release moisture. It's not only shrinkresistant and waterrepellent but also boasts an antiodour function.

Crafted with stateofthe-art fibre, this lining is not only resistant to abrasion but also exceptionally breathable and smooth to the touch. It's antibacterial and antistatic and maintains the ideal microclimate inside the footwear.

INSOLE - TECHNOLOGY

State-of-the-art removable insole that seamlessly blends functionality with comfort in a unique design. Crafted from polyurethane and polyether, it's antistatic and offers superior protection from impacts and strains. The density of the materials used and its significant thickness, peaking at 14 mm in the heel, guarantee unbeatable cushioning. The foot-facing surface, fashioned from 100% polyester, boasts a honeycomb pattern, optimising moisture absorption and release and the channelled design beneath ensures continuous air circulation within the shoe.

The THERMO FORMED removable insole is expertly crafted to distribute the wearer's weight uniformly. It seamlessly adapts to the foot's natural morphology and boasts anti-static, antibacterial, and antifungal properties. For added comfort, a cushioned insert is thoughtfully positioned in the heel area.

Designed for all-day comfort, this removable insole features a polyurethane gel insert in the heel region, adept at absorbing shocks and dampening vibrations. Crafted from antistatic polyurethane using a thermoforming process, its distinguishing feature is the upper surface. This part, in direct contact with the foot's sole, is treated with antimicrobial and antibacterial agents, effectively preventing the growth of microorganisms responsible for unpleasant odours.

Crafted with state-of-the-art fibers, this lining is not only resistant to abrasion but also exceptionally breathable and smooth to the touch. It is antibacterial and antistatic, maintaining an ideal microclimate inside the footwear.

CERVA VAM BOX

GLOVES

RESPIRATORY PROTECTION

EYE PROTECTION

GARMENTS

HEARING PROTECTION

HYGIENE

- ✓ Spiral vending machine
- ✓ Flexible configuration and adjustable shelf height
- ✓ Holds up to 72 individual products

- ✓ Maximum capacity 1700 products
- ✓ Ideal for high-turnover items
- ✓ Various product assortment

REDUCES WASTE OF PPE AND CONSUMABLES

WHY CHOOSE CERVA VAM BOX?

- ✓ Lower risk of piling up out-of-date supplies
- ✓ The vending machine can be placed directly at the workplace
- ✓ You can identify the department with high consumption
- ✓ You can set limits on PPE allocation per worker
- ✓ Monitors and tracks consumption by department and worker
- ✓ No need to order the goods to refill the CERVA VAM BOX
- ✓ Saving time when dispensing PPE
- ✓ Reducing the risk of theft and loss
- ✓ PPE availability 24/7
- ✓ Access items by type of work activity
- ✓ Reduces PPE costs
- ✓ Real-time inventory monitoring

UNIQUE ADVANTAGES!

A wide selection of PPE in one place

We will fill the CERVA VAM BOX with what your employees need. It is only up to you and the needs of the company. Your employees will always have what they need and they will always be protected.

Save both time and money

Speed up PPE issuance and save time you normally use to order it. Moreover, you will save up to 40% of issued products.

Complete service for your company

All you have to do is choose what you need from the VAM BOX. You do not have to worry about the operation of the VAM BOX.

All at one touch

The CERVA VAM BOX displays the quantity of products and the amount to be refilled in real time. The software sends automatic emails and can export consumption data into Excel for further analysis. Automatic updating of employees and their PPE entitlements.

Monitoring of employees and their consumption

Keep full control over PPE consumption. The CERVA VAM BOX allows you to set the number of withdrawals for each employee and the permitted sizes. You can then conduct consumption checks and analysis.

CERVA VAM BOX is easy to use

To take the necessary PPE, employees simply need their attendance card or chip.

TECHNICAL PARAMETERS:

VAM 8
